

## EMC, RF & Microwave Projects

*Turnkey · Integrated · Flexible*

For all your projects having the need of a turnkey approach, DARE!! Projects is your partner from the definition phase to final delivery. Our competences are mainly RF related and applications can be found in the markets of EMC, general RF and specialized Microwave projects.

### Organisation

All project related activities are offered through the DARE!! Projects Organisation. With a number of sister companies under the DARE!! International umbrella, DARE!! Projects has easy access to for the implementation of additional services into these projects.

- DARE!! Instruments for a wide variety of RF instruments
- DARE!! Measurements for CE and LVD qualification of the designs
- DARE!! Calibrations for ISO17025 calibration of individual system components
- DARE!! Development for project specific design work, hard as well as software

### Independent

We do not limit ourselves to our own products only. As we are independent from major instrumentation suppliers in the market, we are open to discuss specific wishes from our customers to integrate specific instruments in the design.

### Project Management

Complex designs are managed by DARE!! Projects while keeping the customer in the loop of the process for monitoring and acceptance purposes. For this reason we execute our projects in various steps allowing the customer to follow, check and confirm that the design is compliant to his specifications.

Most projects are split in the following milestones:

- Project kick-off
- PDR, Preliminary Design Review
- CDR, Critical Design Review
- FAT, Factory Acceptance Test
- SAT, Site Acceptance Test
